## Trowels

Make: LabTek

Model: SUN-042

Origin: India

**Brick Trowel:** Slightly rounded, diamond-shaped blade / Designed for laying brick, laying block, tamping and cutting bricks  
**Finishing Trowel:** Large, flat rectangular blade / Used to smooth a surface after concrete has begun to set  
**Gauging Trowel:** Rounded tip, v-shaped back / Designed for gauging, or mixing in specified proportions, small amounts of quick set plaster.  
**Margin Trowel:** A tool with a V-shaped back but a rectangular front / Used to mix thinset and other material, for scooping and spreading material such as adhesives in tight spots.  
**Magnesium Masonry Hand Float:** Floating helps remove imperfections and produces a flatter surface. It also compacts the slab and the mortar at the surface in preparation for later finishing operations.  
**Pointing Trowel:** Smaller version of brick trowel / Used to separate concrete from the forms it is poured into, finishing joints in brick walls, and for spreading material in tight spots, filling in small cavities.
