

**Hand Held Calibrator**  
**MODEL – SL - 1411, MAKE – SLBT, ORIGIN – INDIA**

Handy Calibrator is a portable, multi-function calibration device that can handle a wide variety of tasks ranging from verifying multimeters, temperature controllers, and frequency meters. It is able to precisely source and measure voltage, current, resistance, pulse and thermoelectromotive force signals, as well as generate specialized outputs such as signal stepping and ramping. The unit can be battery powered for true portability, or connected to an AC outlet.
